

## Roadster-TC - style meets functionality

The newest model of the helmet specialist convinces with modern urban design and its adaptability in daily use. Well-designed with curved edges and round shapes the CASCO Roadster-TC is a very attractive product with nice fan-shaped vents and harmoniously integrated helmet shield. High-quality matt varnish and the colour accentuation, which is partially finished with dot pattern decoration, are the final touch of the design concept followed in every detail. The appealing look may appear sportier with the optionally available high-quality panoramic visor in optical class 1. It connects seamlessly to the helmet and creates a comfortable draught free view due to its unique sealing to the face. However, it is suitable for eyeglass wearers and can be worn as an alternative to the included sun shield. The Roadster-TC is aimed at all style conscious cyclists who are looking for a special helmet in everyday life and enjoy clever detailed solutions.
